

# CENTRAL COAST MODEL AERO CLUB

## QUAD FIELD SAFETY CODE

The operation of multi-rotor aircraft is conditional on compliance at all times with the following key safety rules, and all other relevant CCMAC and MAAA Policies and Procedures.

### FPV Quads and FPV Quad Racing

1. Pilots must be positioned in the designated pilot area
2. Aircraft must take-off from the designated take-off area
3. Once airborne, aircraft must move immediately away (downfield) from the take-off area
4. For the duration of their flight aircraft must not enter the specified no-fly zone in front of the take-off area
5. Aircraft may re-enter the no-fly zone to land in the designated landing area
6. Spectators who are not club members must be in the designated spectator area while aircraft are in flight
7. Vehicles must not be parked on the concrete area

**General Quad Flying** (non FPV, non racing) - the restriction on the no fly zone (rule 4) does not apply
